

## JANUARY - DECEMBER 1993

<b>A</b>		<b>G</b>		<b>P</b>	
Acoustic emission — new approach to materials listing ...	67	Gas Energy Management Awards 1992 ...	174	Part development with unique P/M combination ...	340
Advanced materials technology transfer centre in action .....	134	Gas-fired contract heat-treatment furnaces installed .....	355	Precision casting — recent developments .....	216
Alternative manufacturing technology developed for auto structures .....	300	Gripping Technology for high temperature testing .....	389	Precision casting investment and developments .....	7
Aluminium benefits materials revolution .....	374			Precision casting — why components are supplied and finished .....	11
Aluminium component manufacture highlighted .....	376	<b>H</b>		Precision imaging for the metals industry .....	388
Aluminium recycler in energy efficient guide .....	291	Heat-treatment mechanisation, from, to, worldwide handling solutions .....	144	Precision inspection .....	379
Aluminium SPF: still finding new applications .....	302	Heat-treatment — the true costs .....	163	Precision metalforming — new techniques .....	46
Aluminium superplastic forming .....	373	High-pressure vacuum gas quench system .....	185	Polymer quenching — progress .....	92
Annual Review .....	323	High productivity aluminium melting furnace .....	233	Portable spectrometry for outgoing product control .....	75
Applications of standard quenching cooling curve analysis .....	282	Hi-tech induction hardening machine .....	20	Powder-forged motorcycle con-rod spotlighted .....	98
Automated listing of engine camshafts .....	195	High technology in P/M processing .....	26	Powder beam techniques for surface modification .....	98
		High temperature control at low cost .....	361	Professional Institute of Forging Technology launched .....	162
		High temperature sintering furnaces developments .....	126		
		High temperature view of furnaces .....	112	<b>Q</b>	
		Hot pressing for difficult to sinter materials .....	137	Quality Testing — Buyers Guide .....	202
		Hot-rolling mills — on-line diameter measurement .....	380	Quality Testing — Contract Services .....	76
				Quality Testing — equipment and techniques in action .....	70
				Quenching technology from ‘black air’ to advanced science .....	262
				Quenching — theory and practice explored .....	98
<b>C</b>		<b>I</b>		<b>R</b>	
CAD/CAM — £1 million investment .....	356	Induction heating, uses and applications .....	57	Rapid prototyping for investment casting .....	213
‘Climched element’ modules .....	59	Induction melting investments .....	148	Remelted steels — processes, products and properties .....	324
CMM manufacturer builds on proven reputation .....	201	Induction system uprates billet heating in Korea .....	46	Rig for awkward hardness testing .....	389
CNC rotary forging, process and product benefits .....	42	Infrared thermometer aids SPC at automotive plant .....	109		
Cold extrusion of flanges on tubes .....	308	Infrared thermometry improves quality control .....	269	<b>S</b>	
Cold Forging ’95 Conference and Exhibitions .....	319	Inspec ’93 — preview .....	152	Sintering — theory and practice highlighted .....	340
Cold/warm forming, advantages in bevel gear production .....	41	Intelligent computer terminal boosts induction heating control .....	52	Spin hardening process .....	165
Computer technology boosts quality testing .....	199	Investment casting industry — market trends update .....	12	Spinel high purity refractory material .....	139
Conferences survey equipment — process advances .....	249			Spray deposition aluminium — lithium alloy developed... ..	128
Continuous extrusion of aluminium from liquid metal .....	231			Superplastic forming and diffusion bonding at British Aerospace .....	305
Control and Instrumentation Exhibition Preview .....	108				
Controlled atmospheres .....	102				
Corrosion resistant nickel-based alloys from HIPped metal powder .....	129				
Critical net shape castings for automotive applications .....	14				
		<b>M</b>		<b>T</b>	
		Machinery (safety) regulations — brief for industrialists ...	106	Taguchi methods — cutting the cost of quality .....	68
		Massive programmable hammer built .....	45	Temperature profiler — easy PLC interfacing .....	113
		Materials and manufacturing technology for industry .....	332	Testing equipment for research in metallic materials developments .....	326
		Materials processing in vacuum .....	187	Titanium — new and emerging applications .....	378
		Mechanically alloyed materials — progress and development .....	125	Tooling and casting produced without design drawings — Tools and dies thermal processing techniques advances (Part 1) .....	27
		Metal and ceramic powder processing improved .....	24	Tools and dies thermal processing techniques advances (Part 2) .....	87
		Metal forming — £30 million investment in copper tube production .....	190		
		Mini gas atomiser development — DTI support .....	25		
		More energy efficient process heating — potential spotlighted .....	259		
				<b>U</b>	
				Ultrasonic piston inspection .....	380
<b>D</b>				<b>Y</b>	
Deregulation spawns supply competition .....	234			Vacuum brazing of diamonds .....	97
Developing heat-treatment group — profile .....	166			Vacuum furnaces for specialised P/M applications .....	23
Developments in ultrasonic inspection .....	388			Video microscopy systems — a look at .....	234
Dew point measurement profile .....	110				
				<b>W</b>	
<b>E</b>				Winning the war on wear .....	277
Electricity delivers environmental control .....	219			Wire and tape — for high performance heating elements .....	181
Electroheat — customer benefits highlighted .....	31				
Electroheat technology — around the industry .....	61			<b>X</b>	
Energy monitoring and target setting — a new approach .....	232			X-ray diffraction — surface and layer analysis .....	381
Equipment and technology highlighted .....	27			<b>Z</b>	
		<b>N</b>		Zero defects for eddy current testing .....	399
		National GEM Award — innovative burner system wins National Profile — Germany .....	238		
		New standards for testing advanced technical ceramics .....	295		
		New technology boosts European heat-treatment .....	135		
		Nickel-base superalloys for gas turbine — development history reviewed .....	100		
		Non-destructive testing in aerospace industry — an overview .....	333		
			193		
				<b>O</b>	
				On-line grain size measurement of s/s strip .....	379
<b>F</b>					
“Factory of the future” forging project, DTI supports .....	318				
Fast press unit with forge manipulator .....	48				
Fine ceramic powders using hydrothermal process technology .....	136				
Forge reheal furnace increases production capacity .....	236				
Furnace for ceramics research .....	59				
Furnaces ’93 boasts confidence .....	352				

**January 1993 issue**  
Mechathem: International – company profile  
**June 1993 issue**  
Forging Technology – special publication  
**August 1993 issue**  
Alux Magnetherm Ltd – company profile  
**September 1993 issue**  
Engineering Ceramics – Buyers Guide  
British Gas – company profile  
**October 1993 issue**  
Contract Heat-Treatment Supplement  
Eurovac Furnace Systems Ltd – company profile  
**November 1993 issue**  
Forging Technology – special publication  
**December 1993 issue**  
Annual Furnace Supplement & Buyers Guide  
Pfeiffer Vakuum Analalgenbau GmbH – company profile

**A**  
Advances in forging steels ..... FT39  
Analysing field failures in the blocks ..... FT44

**B**  
Business Energy Awards highlight process efficiency ... FUS1

**C**  
Contract Heat Treatment Association - Buyers  
Guide ..... CHT11-12

## AUTHOR INDEX
